

OER CHECKLIST - Digital Image

Evaluator Name: *Eva Egensteiner*

Date: *July 6, 2025*

Title and Type of Media:

Visual Storytelling - AI generated image logo using Bing Image Creator, integrated into infographic on mini-assignment using a Canva template with Canva AI generated graphics.

Resource URL: [Bing.com](https://www.bing.com) & [Canva.com](https://www.canva.com)

License (Creative Commons, shareware, etc.)

The AI-generated images and graphics are free.

The infographic I created is CC-BY-NC-SA

Accessibility (an area for the accessibility/ADA compliance of the resource)

This needs more attention to verify if font choice and size are accessible. The graphics in the images are not used to convey information since they represent the text.

English language appropriateness for non-native speakers (look/listen for challenging terminology and jargon, is Global English used?)

Simple clear language was used in the infographic document.

Content Connections / Relevance

This image logo and infographic are relevant to the mini-course both visually and with the instructional content provided. I think the image logo synthesizes the concept of seeing the world and the possibility of telling a story about something occurring on earth. Ideally it would draw students into the topic and demonstrate the myriad possibilities of storytelling.

Quality of Materials

Good quality images and infographic using edX suggested sites and software.

Summary/Comments (an area for the person evaluating the resource to include comments and a summary of the evaluation).

I had this logo image AI generated using Bing Image Creator. It will be used together with the words, "Visual Storytelling", which is the name of my mini-course. I converted the image into black and white and edit out the background in Adobe Photoshop. I then exported it as a .png to allow for transparency.
